Jahmarra/Jason,

Add. #1 Questions:

9. The grades along the median curb on Kamm have been raised up to +/-1" from the previous set of plans. Was this meant to be a 2" grind and 3" overlay like El Monte has now become?
10. Sheet X1 for Kamm says to regrade and recompact the baserock/dirt areas as necessary. Do the new grades supersede the grind/overlay? I.e. if extra baserock is needed to make grade after grinding, will the contractor be paid accordingly?

Jahmarra/Jason,

8. The demo sheets show full asphalt and baserock removal as 15.5". Sheet X1 shows a Kamm full replacement as 3" HMA over 8" agg. Base and sheet X2 shows College full replacement as 4" HMA over 5" thick agg. Base. Please clarify the structural section of the full depth removal and replacement.

Jahmarra/Jason,

6. (60) Working Days will not be enough time for this project. Please reconsider for (120) working days.

7. Is there any information or core samples taken to verify the actual structural section of asphalt thickness at varying locations?

Thank you,

Questions - 2025 Corridor Improvements Project

1. Please clarify what concrete is being considered for BI#33 'Construct Concrete'.
2. Is there an intended start date for this project? Depending on the answer, winter paving and/or labor/material escalations need to be considered.
3. What is the engineer's estimate?

Thank you,
